

 **Current Position**
Status: Student
Skills: Python, Web Development
Stage: Early-career, foundational technical base

 **Target Goal**
Objective: Land a job or internship
Timeline: 6 months
Best-fit tracks: Software/Web Dev, Data/AI-adjacent roles

 Skill Gap Analysis

 **Strengths**

PythonWeb DevelopmentSelf-starter (Student)

 **Gaps to Close**

Git/GitHub workflowDSA basicsDeploymentPortfolio
Resume/LinkedInInterview skills

 Recommended Learning Plan

Phase	Focus Area	Key Topics
Month 1-2	Foundations	Git/GitHub, DSA basics (arrays, strings, hashing), REST APIs, SQL basics
Month 3-4	Specialization	Full-stack framework (React + Node/Django), deployment (Vercel/Render), auth & DB integration
Month 5	Interview Prep	DSA practice (medium-level), system design basics, mock interviews
Month 6	Job Search Sprint	Resume polish, applications, referrals, negotiation basics

 Suggested Projects

Project	Purpose / Skills Shown
Full-stack web app (e.g. task manager, marketplace)	Demonstrates end-to-end dev: frontend, backend, DB, auth, deployment
Python automation tool / API integration	Shows scripting, API usage, problem-solving
Open-source contribution (2-3 PRs)	Proves collaboration, Git fluency, real codebase exposure

 Networking Strategy

LinkedIn

- Post weekly build-in-public updates
- Connect with 5 professionals/week in target roles

Communities

- Join Discord/Slack dev communities
- Attend 1 local/virtual meetup monthly

Direct Outreach

- Cold-message alumni & recruiters
- Ask for referrals after each project ship

 Monthly Milestones

M1-2	M3	M4	M5	M6
Foundation - Git mastery - DSA basics - SQL essentials	Build - Start major project - Learn framework	Ship - Deploy project 2nd project + OSS PRs	Prepare - Mock interviews - Resume finalized	Land It - Apply widely - Interview & negotiate

 Immediate Next Actions

1. Set up GitHub profile + push first repo this week 2. Pick ONE full-stack framework and start a 2-hr/day learning block	1. Optimize LinkedIn headline & summary for target roles 2. Start daily DSA practice (1 problem/day, min. 20 min)
